

Dr. Carlo Fabbri has been for a few months head of gastroenterology in Forlì and Cesena, on the front line against cancer. Member of the European Society of Gastroenterology and Endoscopy, of the American Society of Gastroenterology and Endoscopy, he is also regional Past-President of the Italian Society of Digestive Endoscopy and ordinary member of the Italian Club of Ecoendoscopy.

Thanks to Dr. Carlo Fabbri the digestive ultrasound is developed in Romagna hospitals.

It is an exploratory method of the digestive tract that associates the endoscopic image with the ultrasound vision with great advantages for patients, especially in the early diagnosis and treatment of tumors.
